Linking claims 1 and 2 are allowed. Since the restriction requirement between inventions I and II, as set forth in the Office action mailed on 12/20/04, was conditioned on the nonallowance of the linking claim(s), **the restriction requirement as to the linked inventions is hereby withdrawn.** Claim 3, previously withdrawn from consideration as a result of the restriction requirement, is hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement as to the linked inventions, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

This application is in condition for allowance except for the following formal matters:

Claims 1-3 are objected to because of the claim language. In claim 1, line 6, it is suggested to change "*of which the major characteristics are*" to "*said mechanism comprising*"; line 7, to change "*the joint post is inserted*" to "*a joint post being inserted*"; and in line 10, to insert "*of the LCD display*" after "*a semi-circle cavity*" for the claim language being clear. In claim 2, line 2, it is suggested to change "*the Claim 1*" to "*Claim 1*"; and in line 3, to change "*the hanging*" to "*a hanging*". In claim 3, line 2, it is suggested to change "*the Claims 1 and 2*" to "*Claim 2*" because the feature

"the hanging frame" of claim 3 is previously recited in claim 2, not in claim 1.

Claims 1 -3 would be allowable if amended to overcome the above objection to.

Claims 1-3 are allowed over the prior art of record because none of the prior art discloses or suggests a rotating and reversing mechanism for an LCD display having the features *"the lower end of a joint post being inserted into the connecting holes on one rim of the upper and lower casings, locked with a screw permitting to rotate at a limited angle, and the upper end of the joint post is inserted into a semi-circle cavity (of the LCD display) and locked with a pin in the LCD display permitting a 360° reversal"*.

Kawai et al and JP 2000-11626 disclose a LCD display which can be rotated at 180° and can be overlapped on the back of the CD player. However, Kawai et al are silent about *"the lower end of a joint post being inserted into the connecting holes on one rim of the upper and lower casings, locked with a screw permitting to rotate at a limited angle, and the upper end of the joint post is inserted into a semi-circle cavity (of the LCD display) and locked with a pin in the LCD display permitting a 360° reversal"*.

The JP 10-126068 disclose a LCD display which can be rotated at 360°. However, the JP 10-126068 is silent about *"the lower end of a joint post being inserted into the connecting holes on one rim of the upper and lower casings, locked with a screw permitting to rotate at a limited angle, and the upper end of the joint post is inserted into a semi-circle cavity (of the LCD display) and locked with a pin in the LCD display"*.

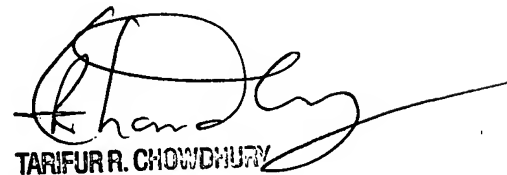

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
